```jsx
import React, { Component } from 'react';

class Getuser extends Component {
 constructor() {
  super();
  this.state = {
   user: null
  };
 }

 async componentDidMount() {
  const response = await fetch('https://api.randomuser.me/');
  const data = await response.json();
  this.setState({ user: data.results[0] });
 }

 render() {
  const { user } = this.state;
  return (
   <div style={{ textAlign: 'center', marginTop: '50px' }}>
    {user ? (
     <div>
      <h2>
       {user.name.title} {user.name.first} {user.name.last}
      </h2>
      <img src={user.picture.large} alt="User" />
     </div>
```

```
      ) : (
        <p>Loading user...</p>
      )}
    </div>
  );
 }
}

export default Getuser;

import React from 'react';

import Getuser from './Getuser';

function App() {
  return (
    <div className="App">
      <Getuser />
    </div>
  );
}

export default App;
```
